### **DETAILED ACTION**

Claims 1-33 are presently pending and subject to the following restriction requirement.

#### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

The number of distinct inventions is so broad that the Examiner is unable to identify the sheer number of inventions. It appears to be practically limitless in number. Hence, the groups of inventions are listed as simple Group I –unknown, as a specific chemical compound must be elected, (each and every generic group within the compound must identified with what would normally be listed as a species of chemical; i.e., should Applicant elect group I, they must also list a specific chemical entity as the core, focal point functionality, branch cell, etc., to identify a single chemical compound. In other words, Applicant's claim is restricted to a single specific chemical compound.)

Group I-unknown, claim(s) 1-24, and 26-33, drawn to a specific chemical species encompassed by the broad scope of Formula I. Applicant is requested to identify in response, those claims which embrace the specific chemical compound elected. (Applicant should identify the chemical compound which is elected, and the claims which read on it. Claim 3 is included with Claim 1 as the species are not mutually exclusive.)

The inventions listed as Groups I-unknown do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The generic core structure is very large, and hence embraces a very wide special technical feature. Claim 1 is contains a structure which is embraced by WO 96/15778 to Kabanov (e.g., Formula XVII). Such structure contains a core, as well as four polymers branching from it. Hence, Kabanov anticipates the broad claims, and

hence, also the special technical feature. Further, the structure of each compound being distinct, requires a distinct consideration for art as well as examination. Hence, these compounds share no general inventive concept.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ROBERT M. KELLY whose telephone number is (571)272-0729. The examiner can normally be reached on M-F, 9:00am-5:00pm.
